## The Beginnings

Ancient beliefs in the region divide humanity's passage on earth into three cosmic, mythic, and historical periods. Of the three, of course, only the third or the historical period is real. The other two have cosmological and mythological values that enhance our understanding of the present-day peoples of the region. One day elements of the mythic period might prove to be real but for that we need more solid documentation than is available at the present.

For the purposes of this comprehensive chronology of the region, the cosmic and mythic periods are presented in the sequential order preserved in ancient chronologies. No attempt is made at correlating those eras in any form with historical or real time.

## The Cosmic and Mythic Eras

The initial 3000-year battle between the forces of Ahura Mazda (Good) and Angra Mainyu (Evil) leads to the defeat of the latter.

The second cycle of 3000 years begins with Ahura Mazda's creation of the cosmic world, i.e., the creation of the sky, water, earth, plants, the sacred white bull, and the cosmic man (Gayomart). Truth, symbolized as fire, permeates Ahura Mazda's kingdom.

Creation continues with Ahura Mazda's creation of the Amesha Spentas or Holy Immortals. As Vice-Regents, the immortals serve as "governors" or administrators of the various realms of Ahura Mazda's Kingdom.

Destruction of Ahura Mazda's cosmic world by Angra Mainyu brings the second phase of creation to an end. However, Angra Mainyu who had entered Ahura Mazda's creation through a crack in the sky and who had polluted the water, poisoned the plants, and killed both the sacred bull and Gayomart cannot bail out. Truth, which has patched up the sky, keeps Angra Mainyu trapped within creation.

The third 3000-year cycle begins with the sojourn of the Seed of Stain Gayomart or cosmic man to the Moon where it is preserved and purified by the Sun.
Return of the seed of Gayomart to earth and its appearance in the form of a sacred rhubarb plant with two joined stems.
Growth of the first man (Mashya) and the first woman (Mashyannah) out of the two stems of the sacred rhubarb plant.
Marriage of Mashya and Mashyannah resulting in the first population of earth.
Creation of the farr by Ahura Mazda. Farr being the symbol of legitimacy with which Ahura Mazda distinguishes his deputy on earth.
Ahura Masda's singling out the most worthy of men to serve as his deputy.
Ahura Mazda invests Gayomart/Kayumars with the farr. Kayumars begins the eradication of evil from Ahura Mazda's domain.

<b>The Pishdadian Dynasty</b>
Kayumars offsets the ruses of evil, a force determined to eradicate the race of man from earth.
Kayumars' son, Siyamak, is murdered.
King Hushang discovers the use of fire which leads to the discovery of metals and of weapons with which to combat evil. Hushang also harnesses the rivers, produces lush fields and meadows, domesticates animals and uses their products as a source of untold prosperity.
Tahmuras, Hushang's successor, chooses wisdom as his weapon against Ahriman. Under Tahmuras, the domestication of animals is perfected, weaving is introduced, and plans are devised to eradicate the race of the divs or demons from the face of the earth. The sciences and the arts make considerable progress.

Under Jamshid, the farr encompasses both the secular and the spiritual domains. In administration, Jamshid follows the tradition of his forefathers and introduces the finer approaches to weaving and to the production of elegant and luxurious objects. He also launches a number of innovations, including the division of people into four distinct castes and guilds. Under Jamshid, artisans, merchants, priests, warriors, and tillers of the land all know their place in society.
To immortalize his efforts at good government, which had resulted in the eradication of death from the face of the earth, and to welcome the arrival of a new epoch, Jamshid holds a magnificent celebration, the Now Ruz (new year).
Finally, convinced that he is in full control of all aspects of the world, Jamshid reaches to supplant the Creator. He fails. His conceit costs him his farr and the people of Iran their prosperity.
Zahhak, the embodiment of Evil, steps in and reigns for a thousand years. Two snakes issuing from his shoulders demand fresh brains daily. Can this demand deplete Ahura Mazda's world of people?
Abtin, in whose person the farr had been preserved, is found and brought back to the heartland.
Abtin's son, Fereydun overthrows Zahhak and makes the land prosperous again. At the end of his reign, he creates discord among his three sons by dividing his kingdom according to merit rather than to tradition. He assigns Rūm and the west to Salm, Turan and China to his oldest son, Tur, and Iran and India along with the farr to Iraj, his youngest son.
Rebelling against their father's seemingly unjust division of the kingdom, Salm and Tur conspire and murder Iraj.
Manuचेhr rises against Salm and Tur to avenge Iraj; but he, too, is killed.
Under oppressive King Nowzar, Iran falls prey to the forces of the Turanian Afrasiyab, but it survives.
The boundary between Iran and Turan is established at the Oxus River (present-day Amu Darya).
The Pishdadian dynasty comes to an end.

<b>The Kayanian Dynasty</b>
Kayqubad, the founder of the Kayanian dynasty, and his assembly of knights push the forces of Afrasiyab out of all the lands south of the Oxus River. The Oxus remains the boundary between the two realms.
Kaykabus ascends the throne.
While on patrol in the woods, warriors Tus and Giv (pronounced giv) find a maiden there and . When they fail to come into an understanding as to whom she belongs, they take the matter to the king. Kaykabus settles the dispute by assigning the maiden to his own harem. Being related to both Iran and Turan by birth, this mysterious woman plays a pivotal role in the later developments in the courts of Iran and Turan.
Siyavosh is born to Kaykabus and the maiden found in the woods.
At a tender age, Siyavosh is assigned to the national champion, Rustam, who takes him to Zabulistan. Under Rustam's supervision, Siyavosh becomes conversant in the manners of kings and courts.
Siyavosh returns from Zabulistan and resides at the court of his father.
Sudabeh, one of Kaykabus's wives, sees Siyavosh at court and takes a fancy to him. She asks her husband to send Siyavosh to the women's quarters so that the price becomes familiar with his mothers and sisters.
At Sudabeh's chamber, Siyavosh refuses the amorous advances of his step-mother. Sudabeh accuses the Prince of attempted rape.
Kaykabus takes the case of Sudabeh versus Siyavosh to an assembly of mu'bad or Zoroastrian priests for decision. The assembly rules trial by fire.
Siyavosh passes through a mountain of fire prepared by the mu'bad to prove his innocence of Sudabeh's charges. Sudabeh refuses to take the same test. Rather, she produces the still-born child of one of her maids as proof of Siyavosh's advances.

Afrasiyab invades Iran and captures some of the land to the south of the Oxus.
Helped by Rustam, Siyavosh soundly defeats Afrasiyab whose forces withdraw to the eastern shore of the Oxus.
Afrasiyab sends his national champion, Piran, to Siyavosh and sues for peace.
Siyavosh signs a peace treaty with Afrasiyab and pledges his word that he would not resume the war. He then sends Rustam with a Silken letter, hostages, and gifts to his father and asks for his blessing.
Kaikabus rejects Siyavosh's peace treaty and orders him to cross the Oxus and capture Afrasiyab. Siyavosh finds himself in a bind.
With the assistance of Piran, Siyavosh defects to Turan at the head of his own personal army.
Siyavosh travels in Turan and meets Afrasiyab.
Siyavosh builds Siyavoshgord in far off lands in the east.
Siyavosh marries Jarirah, Piran's daughter.
Farud is born to Siyavosh and Jarirah.
Years later, Tus marches on Turan and, against the wishes of Kaikabus, kills Farud.
Siyavosh marries Afrasiyab's daughter, Farangis.
Siyavosh is killed as a result of intrigue created by Afrasiyab's brother, Garsivaz.
Kaykhusrau, Siyavosh's son, is born and with the help of Piran is taken to Iran.
Kaykhusrau becomes king and decides to unify Iran and Turan.
Recognizing the might of Kaykhusrau, Afrasiyab creates a coalition force comprising the Chinese, Indians, Slavs, and other peoples of the region.
Kaykhusrau destroys Afrasiyab's international coalition and concludes the Great War in favor of Iran. He then eliminates both Afrasiyab and Garsivaz and unifies Iran and Turan.

Kaykhustrau tours all the lands controlled by a united Iran and Turan.
Kaykhustrau predicts the coming of Zoroaster who would bring din (order) to replace kin (vengeance) that had fueled the animosity between Iran and Turan since the time of Faridun's division of Iran.
Kaykhustrau steps down as king after he singles out Luhrasp as the most worthy person to replace him. He convinces Iranian warriors of the veracity of his action by mentioning that Luhrasp not only carries the far but that the king who would welcome the Prophet Zoroaster would belong to his house.
Kailuhrasp becomes king.
Kailuhrasp's son, Kaygushasp, welcomes the Prophet Zoroaster to his court and supports him against the ravages of the nomadic tribes to the east.
The Kayanian dynasty comes to an end. The last 3000-year cycle of real history begins.

### BC 5000 to the Christian Era

<b>BC</b>	<b>Events</b>
5000	On the Iranian plateau, a settlement of hunters, gatherers, and potters is established at Siyalk to the south of present-day Tehran. The settlement is ruled by women who also serve as creators of agriculture and repository of knowledge about edible roots. Women also serve as guardians of the fire. Similar settlements exist at Susa, Tepe Hisar, Tepe Gujan, Zuriyeh, and Hasanhlu. The dead are buried under the floor. Shells from the Persian Gulf indicate familiarity with trade while carved bones, hammered objects, stone tools, knife blades, sickle blades, axes, and scrapers bespeak the existence of a rudimentary civilization. Pottery, although coarse, is painted with primitive designs mimicking everyday objects. A primitive textile industry uses stone spindles. Piseh housing protects them against the elements. Between 5000 and 2000 BC, to the northeast of Siyalk, agriculture is modeled on the Siyalk and other Middle Eastern settlements. The people of that region are also involved in raising livestock, a practice that continues to play a major role in the economies of present-day Central Asia.

4000	Wheat and barley are bartered for furs and arrows. Communal labor builds houses, cleans the ground, and provides means for irrigation. Use of the horse facilitates transportation and travel while discovery of precious stones leads to the creation of jewelry. Metal and pottery works of the time display realistic designs of ibexes, birds, and boars on bowls, utensils, and jars. Women command armies. Next-of-kin marriage is practiced.
3000	Cylinder seals are used to identify ownership or mark prices. Pottery, produced on the wheel, carries more sophisticated designs, jewelry is refined. Bricks, made in molds, improve housing. In present-day Central Asia two-wheel chariots come into use and a combination of tin and copper resulting in the production of bronze contributes to the production of new tools and weapons. # Indo-European Scythian, Mede, and Pars tribes invade the plateau through the Caucasus. The Mede settle the region south of the Caspian, assume leadership, and create an empire; the Pars move south to Parsamush.
2000	The settled Andronovo culture around Lake Issyk Kul leaves a wealth of bronze tools and pottery. Similarly, the settled Chust culture leaves a wealth of cave and rock drawings. On the Iranian plateau, the newly arrived Indo-European invaders establish a divine (Ahuric) order comprising the king of kings who occupies the uppermost level of the hierarchy, and a group of lower kings who, in turn, are supported by princes, nobles and free men. Similarly, a hierarchy of priests, landowners, craftsmen, peasants, and slaves appears that caters to the spiritual and material needs of the ruling class.
1400	In Central Asia, the discovery and use of iron for making objects changes the way tools and weapons had been made in the past. Classical Greek civilization is established with the city-states at its center and trade and literary and cultural developments as its auxiliaries. The compilation of the <i>Iliad</i> and the <i>Odyssey</i> remains among the major achievements of that era.
800	Between 700 and 100 BC, nomadic Scythians, an Iranian people, invade the regions in present-day southern Russia and establish trade with Greece. They are the first to establish a pastoral culture and a viable political system.

614	Between 600 and 100 BC, a people known as the Pazryk lives in the eastern regions of Central Asia. Their culture is similar to that developed on the Iranian plateau except for a very heavy emphasis on the use of wool in textile production. Like the Scythians, the Pazryk bury their dead under artificial mounds known as kurgans. The possessions of the deceased, including chariots, horses, and necessary household utensils are buried with the body.

1992	14 Aug. This connection suggests Opposition involvement, especially in relation to Nabiev's attempt at removing opposition sympathizers from the National Security State and Defense Committees. 1992	8 Oct.	Between October 8 and 24, in Tajikistan, as the Opposition weakens and its constituent parties are disestablished, the chaotic situation in Dushanbe worsens. Kenjaev raids the Internal Affairs Office of Regar and carries away all its guns and ammunition. The Dushanbe-Kulab highway is placed under Russian protection. Fighting intensifies in Qurqanteppe; centers are set up in Kulab and Dushanbe to receive refugees. High-ranking officials leave Dushanbe. Ayatollah Ahmad Jannati warns against the return of Iranian exiles who, along with their power, would bring corrupt Western values detrimental to Muslim artists trying to express themselves.	1992	26 Oct. He is elected Chair of the Executive Committee of the Kulab Soviet on Nov. 2, 1992, Chair of the Supreme Soviet of Tajikistan in Nov. 19, 1992, and President of the Republic in Nov. 6, 1994.	1992	27 Nov. The two regions had been united under this name from 1988 to 1990, when they were separated due to friction between the Kulabis and the people of Qurganteppe. Khatlon has been the scene of much of the fighting because Kulab supports the Constitutionalsists while Qurganteppe supports the Opposition.

The goal of the negotiations is to persuade the "Popular Democratic Army," supported by the Opposition, to surrender its weapons before use of force becomes necessary. The negotiations are not successful. The Opposition leaves Dushanbe for Kofarimhon.
1992	7 Dec.	On December 7-8, fighting continues between the pro-Communist forces from Hissar and the Islamic-democratic forces defending Dushanbe on behalf of the Opposition sympathizers. Some 75,000 refugees wait on the Tajik-Afghan border to cross into Afghanistan in order to escape the fighting in Tajikistan.
